Short description

The Department of Orthopaedic Sports Medicine at TUM Klinikum rechts der Isar, chaired by Prof. Dr. Sebastian Siebenlist, specializes in the diagnosis and treatment of acute injuries and degenerative conditions of the shoulder and elbow joints. Its clinical focus includes minimally invasive arthroscopic procedures, tendon and ligament reconstruction, the treatment of joint instability and cartilage damage, and joint replacement surgery. Combining advanced surgical techniques with individualized rehabilitation, the department aims to restore joint function and enable patients to return to their daily activities and sports as quickly and safely as possible. It treats both recreational and elite athletes and is actively involved in clinical research and professional education.

Most recognized techniques

- Shoulder and elbow arthroplasty
- advanced and complex rotator cuff reconstruction
- arthroscopic and open stabilization procedures
- tendon repair
